Papers Published in Volume 16

Number 1

Bivariate distributions with given marginals with an application to wave climate description 1

G. A. ATHANASSOULIS, E. K. SKARSOULIS & K. A. BELIBASSAKIS (Greece)

Second-order wave diffraction in two dimensions 19

M. McIVER (UK)

A hybrid boundary element method for second-order wave-body interaction 27

N. DRIMER & Y. AGNON (Israel)

Wave effects on deformable bodies 47

J. N. Newman (USA)

Number 2

Some hydrodynamic aspects of arrays of wave-energy devices 61

P. McIVER (UK)

Transient waves for ship and floating structure testing 71

G. J. GRIGOROPOULOS, N. S. FLORIOS & T. A. LOUKAKIS (Greece)

Wave diffraction by double flexible breakwaters 87

A. G. ABUL-AZM (Egypt)

Numerical calculations of large transient water waves 101

T. E. BALDOCK & C. SWAN (UK)

Stochastic response of jack-up platform by the method of statistical quadratization . . 113

S. T. QUEK, X. M. LI & C. G. KOH (Singapore)

Wave spectrum scattering by vertical thin barriers 123

I. J. LOSADA, M. A. LOSADA & R. LOSADA (Spain)

Number 3

Scattering of water waves by submerged curved plates and by surface-piercing flat plates 129

N. F. PARSONS & P. A. MARTIN (UK)

Slender-body approximation for slowly-varying wave loads in multi-directional waves . 141
M. H. KIM & W. CHEN (USA)

Probabilistic collision model for a pair of flexible cylinders 165
A. S. DUGGAL & J. M. NIEDZWECKI (USA)

Stochastic characterization of ocean depth and filter approximations for wave kinematics 177
P. SPANOS & S. BHATTACHARJEE (USA)

Numerical Fourier solutions of standing waves in finite water depth 185
C.-P. TSAI (Taiwan) & D.-S. JENG (Australia)

Number 4

Oblique water wave diffraction by thin vertical barriers in water of uniform finite depth 195
B. N. MANDAL & D. P. DOLAI (India)

Probabilistic modelling of quasi-static response of offshore structures subject to nonlinear wave loading: Two approximate approaches 205
G. NAJAFIAN & R. BURROWS (UK)

Velocity measurements in multi-directional waves using a perforated-ball velocity meter 223
J. R. CHAPLIN & K. SUBBIAH (UK)

Global ocean wave statistics obtained from satellite observations. 235
I. R. YOUNG (Australia)

Number 5

Spectral methods for forward-propagating water waves in conformally-mapped channels 249
R. A. DALRYMPLE, J. T. KIRBY (USA) & P. A. MARTIN (UK)

Time-domain computations for floating bodies 267
R. F. BECK (USA)

On the measurement of directional wave spectra 283
I. R. YOUNG (Australia)

Response statistics of non-linearly moored vessels under the action of first and second order wave forces 295
S. McWILLIAM & R. S. LANGLEY (UK)

Technical Note

Wave dispersion on a sheared current 313
H. M. NEPF & S. G. MONISMITH (USA)

Papers published in Volume 16

Number 6

Computations of the almost highest short-crested waves in deep water 317
C. P. TSAI (China), D. S. JENG & J. R. C. HSU (Australia)

Mean drift forces on arrays of axisymmetric structures in a wave tank 327
P. McIVER & C. M. LINTON (UK)

On the side wall effects upon bodies of arbitrary geometry in wave tanks 337
XIAOBO CHEN (France)

Transient fluid motion due to the forced horizontal oscillations of a vertical cylinder . 347
P. McIVER (UK)

Analysis of wave induced drift forces acting on a submerged sphere in finite water depth 353
G. X. WU, J. A. WITZ, Q. MA & D. T. BROWN (UK)

Finite element analysis of two-dimensional non-linear transient water waves 363
G. X. WU & R. EATOCK TAYLOR (UK)

Statistical analyses of the effects of a coastal power plant cooling system on underwater irradiance 373
J. REITZEL, M. H. S. ELWANY & J. D. CALLAHAN (USA)

Calendar of events 381
